

## **“THE TWILIGHT ZONE”**

On Oct. 2, 1959, “The Twilight Zone” aired its first episode and instantaneously became one of television's seminal classics. For fall 2002, UPN will unleash its modernized incarnation into the 21st century. Honoring Rod Serling's profound legacy, this new version of the perennial favorite will envelop viewers in a world of fantasy and suspense.

Award-winning actor Forest Whitaker will host THE TWILIGHT ZONE, which will feature two self-contained stories per one-hour episode. Each story regularly presents known actors as ordinary people in beyond-extraordinary situations as they enter the sometimes frightening, often intriguing, but always suspenseful and surprising world of The Twilight Zone.

UPN's new version of THE TWILIGHT ZONE will embrace the audience's fascination with the mystical and fantastical aspects of the human mind. It will not be a remake of the original series but will respect and expand upon the classic with a new vision for a new generation of viewers.

Pen Densham, Mark Stern, John Watson and Ira Steven Behr are the executive producers. THE TWILIGHT ZONE is a production of New Line Television in association with Trilogy Entertainment Group.
